

HR Attrition Analysis Dashboard

HR Attrition Analysis Report

1. Executive Summary:

This report provides a comprehensive breakdown of workforce retention patterns, identifying critical areas of employee turnover. The objective is to highlight demographic concentrations, departmental trends, and compensation indicators to support proactive human resource strategies.

2. Key Performance Indicators (KPIs):

- * **Total Attrition:** A cumulative total of 237 employees have left the organization.
- * **Attrition Rate:** The overall organizational attrition rate stands at 16.12%.
- * **Average Tenure:** Departing employees served an average tenure of 7.01 years before leaving.
- * **Average Monthly Income:** The mean monthly salary for the analyzed group is 6.50K.

3. Departmental & Demographic Breakdowns:

* Department & Gender Distribution: The Research & Development department experiences the highest volume of attrition, predominantly among male employees, followed by the Sales department which shows similar turnover characteristics.

* Education Field Trends: Employees from Life Sciences and Medical educational backgrounds represent the largest share of overall departures, followed by those with Marketing and Technical Degree backgrounds.

* Age Patterns: Attrition fluctuates across age demographics, with noticeable peaks occurring among professionals in their early to mid-thirties.

4. Strategic Recommendations:

* Targeted Retention in R&D: Investigate workload distribution, career growth bottlenecks, and compensation benchmarks within the Research & Development department to mitigate high turnover.

* Mid-Career Engagement: Design specialized retention and engagement programs for employees in their 30s who show a higher propensity for leaving.

* Exit Interview Analysis: Conduct deeper qualitative reviews on departing staff with tenure around the 7-year mark to identify structural reasons for resignation.
